100% fiber-optic Internet right to your office.
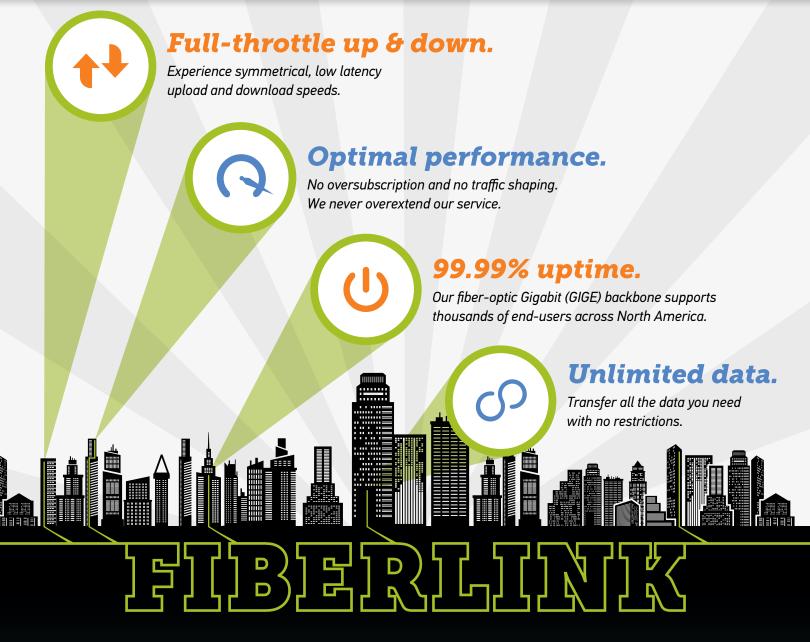

FIBERLINK is enterprise-grade Internet for every business. Gain speed, bandwidth and reliability while cutting overall costs with one privately owned and managed fiber-optic network. Data moves at maximum throughput—no more bottlenecks and no more downtime.

Full-throttle up & down.

Experience symmetrical, low latency upload and download speeds.

Optimal performance.

No oversubscription and no traffic shaping. We never overextend our service.

99.99% uptime.

Our fiber-optic Gigabit (GIGE) backbone supports thousands of end-users across North America.

Unlimited data.

Transfer all the data you need with no restrictions.

FIBERLINK

Powerful North America-wide dedicated fiber-optic Internet service.

Our fiber-optic network gives today's data-driven businesses the connectivity they need, outperforming Cable and DSL in every way. You'll never have to wait on load times again.
