

SOFTPHONES

A simple download turns any computer, tablet or smartphone into a feature-rich IP phone.

Take your TOTAL VOICE network anywhere. Seamlessly integrate with your company directory, contact lists, and other popular business applications like instant messaging, conferencing and file sharing.

Cost Savings

Use cellular data or Wi-Fi to minimize roaming, overage and long distance charges on cellular plans.

Mobility

Take your office anywhere with any device. Office extensions, call routing, presence and many other features work seamlessly while on the go. Experience mobility and flexibility while enhancing your interaction between offices, business partners and customers. Never miss a call, wherever you are.

Productivity

Get voice and video calling, instant messaging, and presence without the hardware—and an intuitive interface to keep it simple to use. Start with an instant message and click to start a phone or conference call, group chat or video conference. It's that easy to stay connected and collaborate effectively.

BYOD

Change any company or personally owned desktop, laptop, tablet or smartphone into a TOTAL VOICE-ready communication tool. Enjoy your preferred device, boosting comfort and productivity. Bring Your Own Device (BYOD) has never made more sense.

Savings

Use cellular data or Wi-Fi to minimize roaming, overage and long distance charges on cellular plans. Extend TOTAL VOICE features like routing internal site-to-site calls over data networks from anywhere on any device—and easily save up to 30% on communication costs.
