

TOTAL VOICE

The last phone service your business will ever need.

TOTAL VOICE is a cloud-based business phone system designed to work for you. HD voice, simple interfaces, advanced features and integrated apps make everyday telecom easier so you never (ever) have to worry about anything other than your core business.

Save your business up to 30%.

Only pay for what you need with a per feature, per user, per month subscription. Installation, maintenance and upgrades are our responsibility, not yours.

Advanced custom telecom.

Experience High Definition call quality, on-demand feature control and the latest phone tools and apps—accessible from anywhere.

High-tech without the hassles.

Cloud-based technology eliminates onsite equipment and IT requirements. Unlike traditional PBX and on-premise VOIP systems, there is no hardware to manage or maintain. Just plug and go.

Risk-free long-term investment. Easily scale your network, integrate new locations, and enjoy the latest features. Our systems are continually updated so that you never have to invest in another technology again.

Reliable HD voice hosted on our private and secure fiber-optic network.

TOTAL VOICE offers traditional PBX functions, plus enhanced features and applications.

Total Voice cloud VOIP gives you on-demand scalability, upgrades, network control and custom feature options without any of the headaches that usually come with high-tech communications. Hosted on Epik's privately managed fiber-optic network, it is fully reliable, secure and data-compatible.

Risk-free network technology.

TOTAL VOICE adjusts to your business, not the other way around. Adding or removing lines or features is as easy as a call. Installation, confiuration and equipment is included so that you can make changes to your network as you need to without downtime or risk.

Save more and get more.

Save your business up to 30% in total cost of ownership without sacrificing one bit of quality. A customizable monthly subscription eliminates the startup costs and operational expenses that come with traditional PBX systems. Installation, configuration, maintenance and upgrades are our responsibility, not yours.

Accessible from anywhere.

Access your network from anywhere with an internet connection. Just plug in your phone at home or use a mobile application to access your office network, including any features and settings you need.

Improve your voice operations.

There's a button, feature or function to make everyday office tasks a little (or a lot) easier. Phone operations are streamlined by comprehensive functions, intuitive interfaces and integrated applications.

Always on, guaranteed.

TOTAL VOICE goes from installation into action with reliability and support guarantees that protect your business. Running on Epik's North America-wide fiber-optic network, your communications will be up 99.99%—that's a single hour (or less) of downtime per year.
