**UC-One[®]:
Cloud Communications &
Collaboration Solutions**

Work Isn't a Place,
It's What You Do

Work Anywhere

Work should be what you do, not where you do it. That means you need communication and collaboration tools that empower your team to stay in touch and access information from anywhere, on any device.

UC-One® unified communications platform is purpose-built for productivity. With user-friendly services delivered from the cloud, you can quickly access information and connect with customers and colleagues to accelerate your business and build revenue.

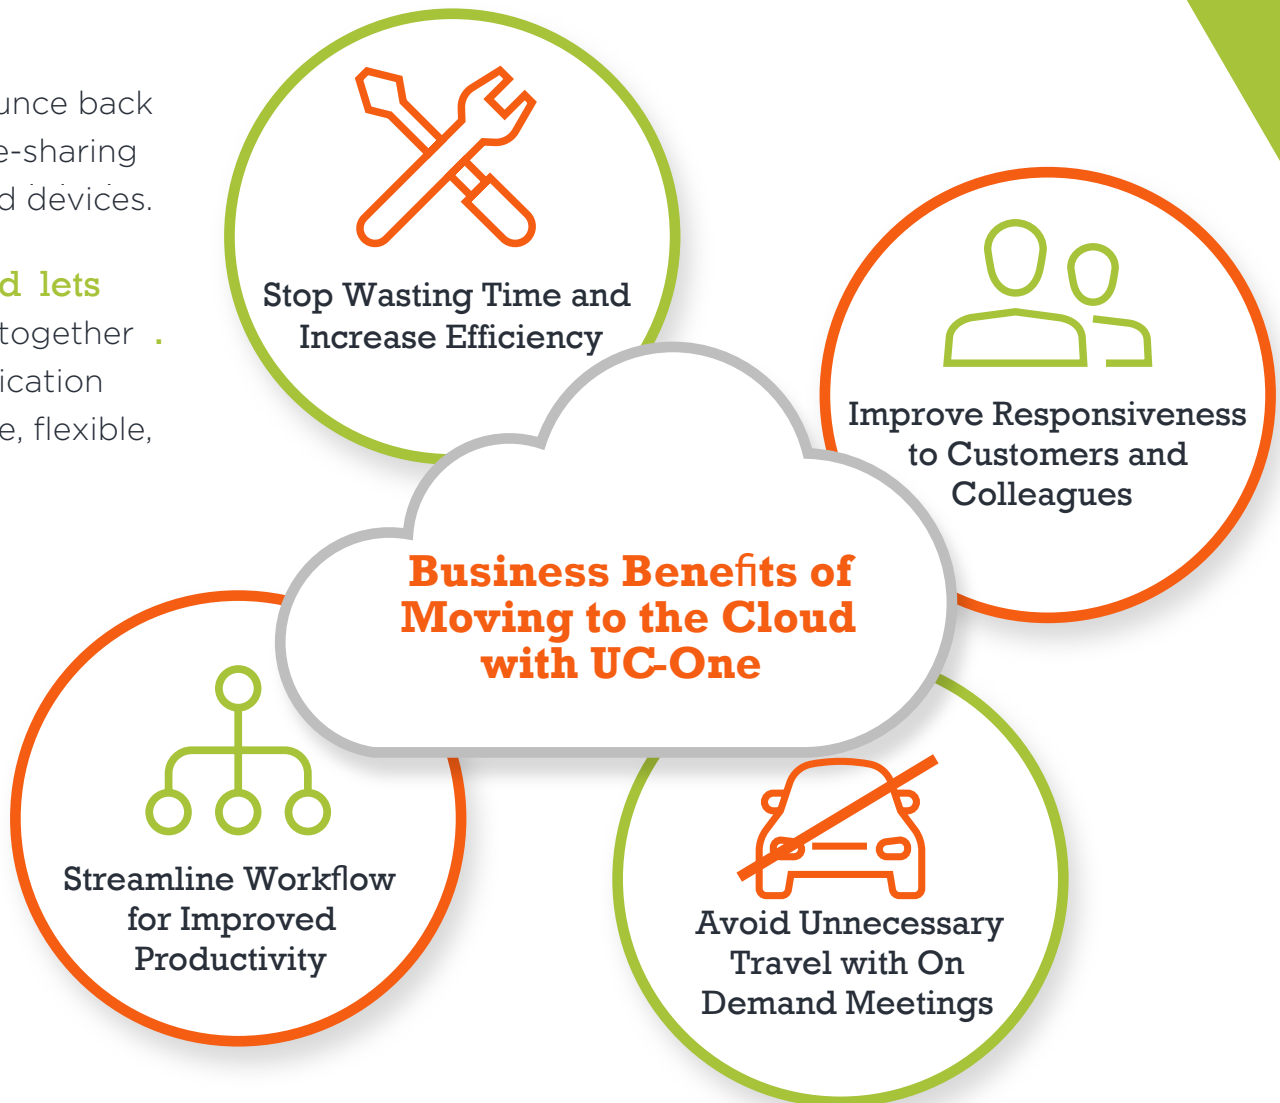

Eliminate Complexity

There's nothing worse than having to bounce back and forth among calls, messaging and file-sharing apps designed for different functions and devices.

UC-One eliminates the complexity and lets you work the way you want. We bring together a wide range of fully integrated communication and collaboration services that are mobile, flexible, reliable and secure.

Instead of jumping from app to app, you will have one convenient and easy-to-use interface for accessing instant messaging and presence, HD audio and video calling, desktop and file sharing, conferencing, mobility – and more.

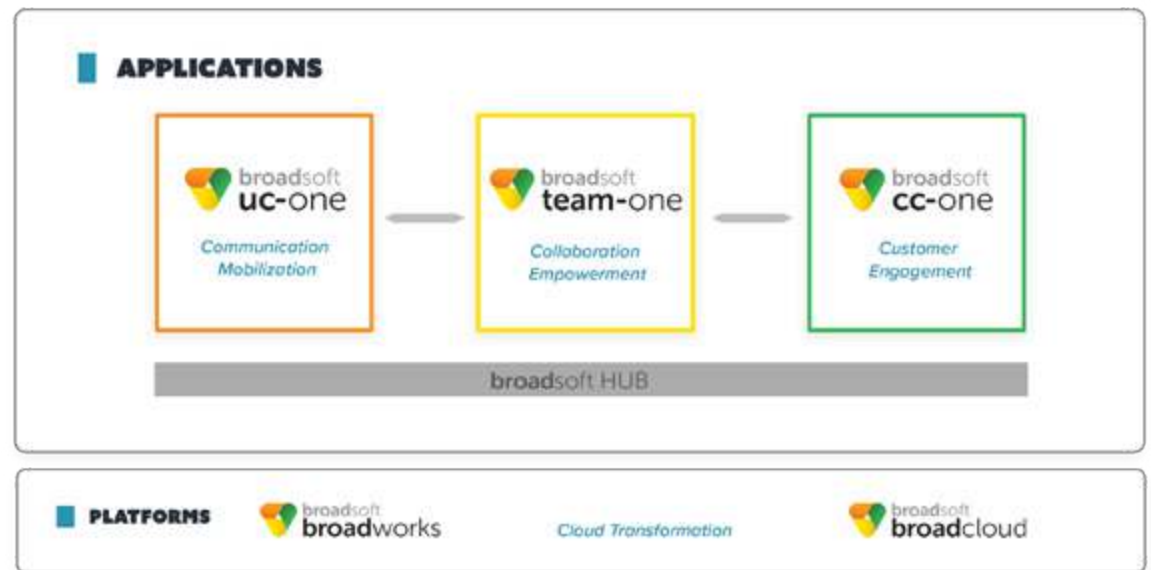

Do It Your Way

UC-One doesn't lock you into a "one size fits all" approach. You can adopt the precise capabilities your business needs, whether it's simple but powerful cloud-based telephony business phone service or the latest in advanced unified communications and collaboration services.

Our UC-One portfolio even includes transformative Business applications you can use to take your organization to new levels:

- CC-One **omni-channel customer engagement and self-service solutions** give you powerful analytics-based routing and reporting.
- Team-One is an **advanced messaging and collaboration** app with integrated calling and conferencing and a powerful set of collaboration tools that put all your work in one place.

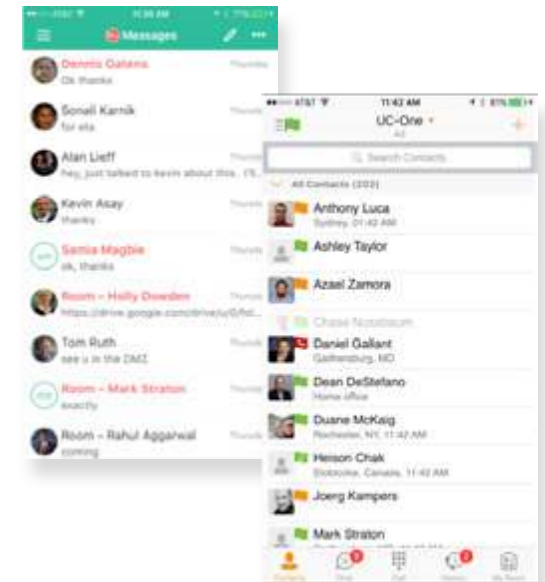

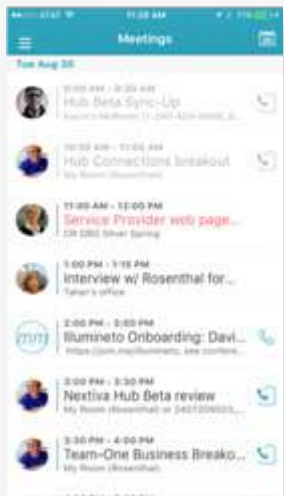

Go Mobile

Today mobility expectations extend well beyond road warriors and senior executives. **All types of workers want to connect and collaborate from wherever they are, with whatever device they have at hand.**

With **UC-One Connect** and UC-One Meet for smartphones and **UC-One Communicator** for PCs, laptops and tablets, members of your team can work as efficiently on the go as they can from the office.

You can locate, message call, and collaborate with colleagues, access your corporate directory, easily establish ad hoc conferences and use find me/follow me to never miss a call.

Meet On Demand

UC-One includes **My Room**—a powerful virtual meeting space that brings together HD voice and video conferencing, multi-party chat and desktop sharing. It's all accessible on demand through a simple and intuitive interface.

Each user has their own room, so there is no competition for meeting times or conference bridges. Invited colleagues, customers, suppliers and partners can connect using a simple “one click” browser link.

My Room’s native document collaboration capabilities give you a **shared workspace** so everyone can see and work on the same information—getting and keeping everyone on the same page.

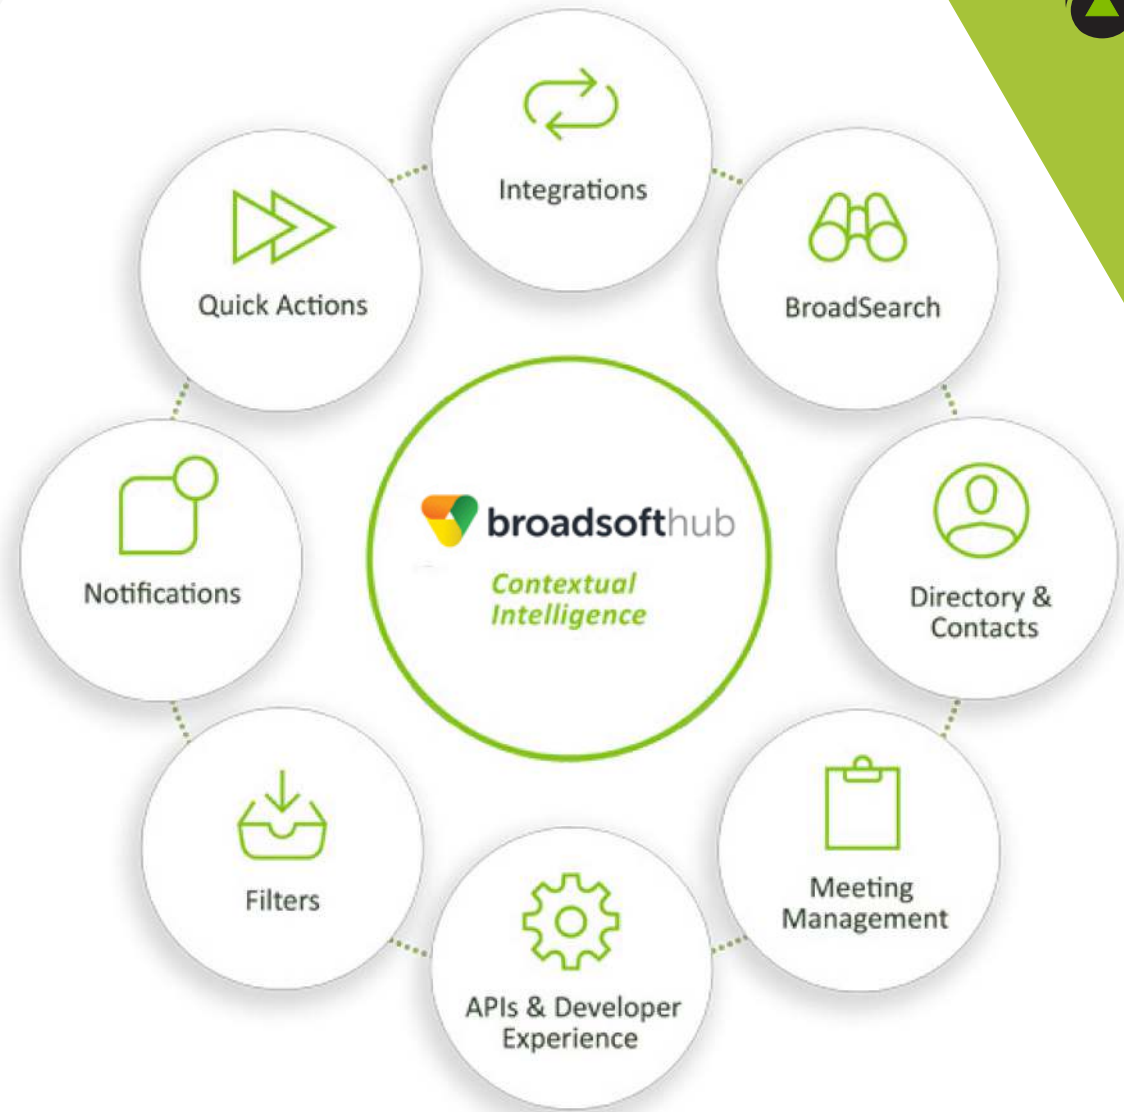

Work Smarter

How many times have you been on a phone call with someone and struggled to find the current version of the document you need to discuss?

UC-One is available with **BroadSoft Hub** that equips you with your **own personal assistant** to keep you organized. Powerful analytics identify the documents, emails and social media relevant to the context of your conversation and organizes them so they are at your fingertips. You can **streamline workflow, operate more efficiently and deliver stellar customer service.**

Stay Safe

You can rest assured your data is always protected.

Carrier-grade security and reliability are built into our UC-One products and services from the ground up.

The security controls we use have been validated by independent organizations to ensure they meet the highest certification and compliance standards. In addition, our UC-One services are backed by **five-tiered redundancy for 99.999% availability, and massive scalability** that ensures business continuity at all times.

About epik networks

Headquartered in Toronto, Epik is a full service telecom provider and an industry leader in hosted voice technology. Over 800 clients count on us to install and support their systems, giving their business the most advanced communications systems available today with the best-in-class service. By moving away from outdated and on-premise equipment, our network eliminates up-front capital costs and reduces internal IT support budgets.

Unified Communications is changing the way businesses operate. Epik is proud to partner with BroadSoft and offer their suite of technologies to small and medium businesses to make them more efficient and competitive.

For more info contact us at **1 866 353 9333**. Our informative **consultants** will help guide you and answer any questions you have.
